1. Who We Are and Scope

Effective date: November 10, 2026 **Last updated:** November 10, 2026

This Privacy Policy explains how **FYA TECH SAS**, a company organized under the laws of Colombia (NIT 901708888-1), with its registered office at Carrera 57 # 99 A - 65, Office 1303, Torres del Atlántico, Barranquilla, Colombia ("**COPP-ADRESD**," "**we**," "**us**," or "**our**"), collects, uses, shares, and protects personal information when you use the COPP-ADRESD mobile applications, the website (coppadresd.com), connected devices (such as our

smart wristband or ring), nutrition and wellness programs, nutraceutical products, communities, and related services (the "**Services**").

This Policy applies to users in the United States. It does not apply to information you give your own healthcare providers, which is governed by their notices of privacy practices. This Policy explains how we handle personal information. Where the law requires consent, we will request it through a separate, specific, informed, and verifiable action, and you may withdraw it at any time. Your acceptance of this Policy does not replace the consents required for particular purposes (for example, health data, precise location, connected devices, emergency contacts, marketing communications, use of AI, community posts, or sharing information with nutrition professionals).

2. Summary of Our Practices

Topic	Short answer
Health and wellness data	We collect it only to provide the Services you request, with your consent, and we treat it as sensitive information.
Sale	We do not sell personal information for monetary consideration, nor your consumer health data.
Advertising	We do not use your health data for advertising or share it with advertising networks or data brokers.
AI	AI features generate guidance and draft wellness plans. Qualified professionals review them as described in Section 6. AI does not replace the diagnosis or advice of a healthcare professional.
Your control	You can access, correct, delete, and export your data and withdraw consents in the app or by contacting us.
Emergencies	COPP-ADRESD is not an emergency service. In an emergency, call 911.

3. Information We Collect

3.1 Information you provide to us

- **Account and profile:** name, email, phone number, date of birth, sex, language, password (stored as a hash), profile photo.
- **Health and wellness information you choose to enter:** height, weight, body measurements, goals, dietary preferences, allergies and intolerances, meal logs, medications and supplements you take, health conditions you report, blood pressure, heart rate, blood oxygen, glucose, sleep, activity, symptoms, questionnaires, and progress photos if you upload them.
- **Nutrition program data:** 30-day cycle plans, approvals, adjustments, adherence, and notes exchanged with nutrition professionals.

- **Family and emergency contacts:** names, phone numbers, and relationship of the people you designate. You must have their permission to share their information with us.
- **Communications:** messages with our AI assistant, the support team, and nutrition professionals; survey responses; community posts and comments.
- **Purchases:** shipping address and product order details. Payment card data is processed by our payment processors (such as Stripe, Apple, and Google); we receive a token and limited data such as the card brand and last four digits, not the full number.

3.2 Information collected automatically

- **Device and connected-device data:** data from our wristband or ring and from wearables or health platforms you connect (such as Apple Health or Health Connect), including steps, heart rate, sleep, SpO2, and similar metrics.
- **Precise location:** only when you enable features that require it (for example, SOS and family alerts) and as described in Section 15.
- **Technical data:** device model, operating system, app version, IP address, language, time zone, crash logs, and diagnostics.
- **Usage data:** screens viewed, features used, and interactions, collected without including the content of your health records.

3.3 Information from other sources

With your authorization, from connected health platforms and devices; from payment processors (payment status); from nutrition professionals and distributors who ship your orders (delivery status); and from public or legal sources where necessary to prevent fraud or comply with the law.

4. How We Collect Information

We collect information directly from you, automatically through the app and connected devices, from the services you connect, and from our vendors acting on our behalf. You decide which optional data to enter or connect.

5. How We Use Information

Purpose	Examples
Providing the Services	Creating your account, preparing and adjusting nutrition plans, monitoring wellness indicators, providing AI guidance, sending reminders, operating SOS and family-alert features, and shipping supplement and device orders.
Safety	Detecting out-of-range readings that you configured, notifying your chosen contacts, and encouraging you to seek professional care.
Personalization	Tailoring plans to your age, weight, goals, and preferences, including the weight-loss and

Purpose	Examples
	weight-maintenance phases.
Billing and support	Processing subscriptions, preventing fraud, and handling requests.
Improvement and protection	Fixing bugs, measuring performance, and preventing abuse. We use de-identified or aggregated data for product analytics and research.
Legal compliance	Responding to legal requests, enforcing our Terms, and meeting tax and consumer-protection obligations.

We do not use health data for marketing or to infer characteristics unrelated to the Services. We send marketing about our own Services only with your permission where the law requires it, and never using health data without your separate consent.

6. Artificial Intelligence and Automated Processing

Our assistant and recommendation features use machine learning and language models to produce wellness information and draft nutrition plans.

- **No diagnosis or treatment.** AI outputs are general wellness guidance. They are not medical advice and may be incorrect. Do not use AI to decide whether to start, change, or stop medications, or to interpret symptoms, allergies, or illnesses; consult a healthcare professional. If a recommendation mentions medications, allergies, conditions, or symptoms, it is presented with a specific warning on the relevant screen.
- **Human oversight.** Nutrition plans are generated with rules and AI and are approved, modified, or audited by qualified nutrition professionals according to our protocols. Some low-risk updates may be approved automatically by rules and are audited by sampling. You may request review by a professional at any time.
- **Providers and data sent.** We use third-party artificial intelligence providers, which process your data only on our behalf. We limit the data sent to what is necessary and avoid sending direct identifiers when they are not required. We require these providers to maintain confidentiality and security, and we do not authorize them to use your data for their own purposes.
- **Service improvement.** We may use de-identified conversations to improve the quality and safety of the service; we do not use your identifiable conversations to train models without your specific consent.
- **Automated decisions and human review.** Some low-risk updates may be approved automatically by rules (see above). COPP-ADRESD recommendations are not used to decide your access to services, pricing, insurance, employment, or third-party benefits. You may request human review of any recommendation or automated decision by writing to support@coppadresd.com or through Settings > Privacy.
- **Safeguards.** We limit data sent to AI providers to what is necessary, filter content, and monitor for unsafe outputs. Do not enter information about other people without their permission.

7. Legal Bases and Consent

We process personal information to perform our contract with you; based on your consent (always for consumer health data, precise location, and optional connected-device data); for our legitimate interests in protecting and improving the Services where the law permits; and to comply with the law. You may withdraw your consent in Settings or by contacting us; withdrawal does not affect prior processing and may limit some features.

8. Who We Share Information With

We do not sell personal information for monetary consideration. We do not use health information for advertising. Providing analytics, security, hosting, support, and communications services may involve disclosures to contracted service providers, limited to the purposes described in this Policy. We do not allow those providers to use the information for their own unauthorized purposes. We share information only as described here:

- **Service providers** under written contracts: cloud hosting, AI and analytics processing, communications (SMS, email, push), support tools, payment processing (Stripe, Apple, Google), shipping and device and product distribution partners, and security services.
- **Nutrition professionals** who provide or supervise your program.
- **Your chosen contacts** (family members, caregivers, emergency contacts) when you enable alerts, and emergency-response or monitoring partners if you activate them.
- **Health platforms and devices** that you connect, in the manner you authorize.
- **Legal and safety reasons:** when required by law, subpoena, or court order, to protect rights or safety, or to prevent fraud. We will limit disclosures and, where lawful, notify you.
- **Business transfers:** in a merger, financing, or sale, subject to this Policy or notice to you and, for consumer health data, your consent where required.
- **At your direction or with your consent,** for example when you share a post in a community.

9. What We Do Not Do

- We do not sell personal information or consumer health data.
- We do not "share" personal information for cross-context behavioral advertising.
- We do not use health data for advertising or to profile for advertising purposes, and we do not allow providers to do so.
- We do not use geofencing around healthcare facilities.
- We do not permit the Services to be used by anyone under 18 (see Section 18).

10. Health Data, HIPAA, and Other U.S. Laws

HIPAA. The application may not be subject to HIPAA when it is offered directly to consumers and does not act on behalf of a covered entity. If the service is offered or provided on behalf of a health plan, insurer, employer, or

other provider subject to HIPAA, the corresponding contractual and regulatory obligations will apply, including business associate agreements where required. How your information is handled will depend on the channel through which you access COPP-ADRESD:

- **Directly by you (consumer):** this Policy and the consumer health data laws described in Sections 11 through 14 apply.
- **Through an employer, insurer, health plan, or medical provider:** we may act as a business associate under a written agreement; in that case, that entity's notice of privacy practices and its obligations under HIPAA will also apply.

COPP-ADRESD provides individualized wellness and nutrition guidance that may relate to your health status; for that reason we treat your information as sensitive even where the service is not subject to HIPAA. Where we act on behalf of a covered entity, the applicable obligations will apply and we will inform you of the applicable channel.

FTC Health Breach Notification Rule. Because we handle consumers' personal health records, we follow the FTC rule: we will notify you, the FTC, and, if required, the media, following a breach of unsecured identifiable health information, without unreasonable delay and within 60 days after discovery.

FTC Act and state laws. We do not make privacy promises that we do not keep, and we do not disclose health information to third parties for advertising without affirmative consent. We also comply with applicable state laws described in Sections 11 through 14, including consumer health data laws, biometric privacy laws (we do not collect face or voiceprints for identification), and data security laws.

Substance use disorder treatment records. We do not request substance use disorder treatment records. Please do not upload medical records that you do not want us to retain.

11. Consumer Health Data Privacy Notice (WA, NV, CT, and Others)

This section is our Consumer Health Data Privacy Policy under the Washington My Health My Data Act, Nevada SB 370, Connecticut's consumer health data provisions, and similar laws.

- **Categories collected:** health conditions and status you report, symptoms, biometric readings (heart rate, blood pressure, SpO2, glucose), weight and body measurements, diet and nutrition data, medication and supplement use, sleep and activity data, precise location when enabled, and inferences produced by our wellness tools.
- **Sources:** you, your connected devices and apps, and your use of the Services.
- **Purposes:** those in Section 5, strictly necessary to provide the product or service you requested.
- **Sharing:** only with the recipients in Section 8. We do not sell consumer health data or share it for advertising.
- **Consent:** we obtain separate consent before collecting or sharing consumer health data beyond what is necessary for the Services. You may withdraw it at any time. General acceptance of this Policy does not replace those consents. We request independent, revocable authorizations for: (1) health data; (2) precise geolocation; (3) connected devices; (4) emergency contacts; (5) marketing communications; (6) personalization and analytics; (7) use of AI; (8) posting in communities; and (9) sharing information with

nutrition professionals. Each authorization is requested on its own screen, states its purpose and recipients, and can be revoked in Settings > Privacy.

- **Your rights:** confirm whether we collect your data, access it, receive a list of third parties and affiliates with whom we share it, withdraw consent, and delete it, including from archives, backups, and processors, subject to legal exceptions and the timeframes described in Section 19. Submit requests as described in Section 12. If we deny your request, you may appeal by replying to our decision; if you are not satisfied, you may contact your state attorney general.

12. Your Privacy Rights

Depending on where you live, you may: **access** a copy of your data; **correct** inaccuracies; **delete** your data; **export** it in a portable format; **withdraw consent**; **opt out** of targeted advertising, sale, and profiling for decisions with legal effects (we do none of these); and **appeal** a denial.

How to submit a request: in the app, go to Settings > Privacy > My Data (access, export, account and data deletion), or write to support@coppadresd.com. We verify your identity using information we already have. An authorized agent may submit a request with your written permission. We respond within 45 days (extendable once by 45 days where permitted) and do not charge for reasonable requests. We will not discriminate against you for exercising your rights.

Account deletion: you may delete your account in the app at any time. Deletion erases or de-identifies your personal data within 30 days, except for data we must retain under Section 19 and the backups described there.

13. California Privacy Notice (CCPA/CPRA)

CCPA/CPRA category	Collected in the past 12 months	Disclosed for a business purpose
Identifiers (name, email, IP, device ID)	Yes	Service providers
Customer records and financial information (limited: payment tokens, last four digits)	Yes	Payment processors
Protected characteristics (age, sex)	Yes	Service providers, nutrition professionals
Commercial information (purchases)	Yes	Payments, shipping partners
Internet and device activity	Yes	Analytics and security providers
Geolocation (precise, if enabled)	Yes	Service providers; contacts or emergency partners you activate
Sensory data (audio or photos you upload or record, if you use these features)	If you use these features	Service providers
Sensitive personal information: health, precise geolocation,	Yes	As in Section 8; used only for permitted purposes

CCPA/CPRA category	Collected in the past 12 months	Disclosed for a business purpose
account log-in with password		
Inferences (wellness information)	Yes	Service providers

This section applies to the extent COPP-ADRESD meets the applicability thresholds of the CCPA/CPRA. The table reflects the categories collected and disclosed during the 12 months preceding the effective date of this Policy. We distinguish among service providers, contractors, third parties, business partners, and advertising and analytics providers. You may know, correct, delete, obtain a portable copy of, opt out of the sale or sharing of your information, and, if applicable, limit the use of your sensitive personal information, from Settings > Privacy or by writing to support@coppadresd.com. We do not sell or "share" personal information (as defined by the CCPA/CPRA) and we use sensitive personal information only to provide the Services you request and for other purposes permitted by Cal. Code Regs. tit. 11, § 7027(m), so the right to limit its use does not apply. We retain information as described in Section 19. California residents may also request information under the "Shine the Light" law (Cal. Civ. Code § 1798.83). Persons under 18 may not use the Services. We have not sold the personal information of minors.

14. Rights in Other U.S. States

Rights may vary depending on your state of residence, the nature of the data processed, the characteristics of the service, and the applicable legal thresholds. We will provide the rights required by the law applicable in each jurisdiction. Sensitive data, including health data and precise location, is processed only with your consent where the law so requires. Response and appeal deadlines depend on your state's law; in general, you may appeal a decision by replying to our response and, if you are not satisfied, contact your state attorney general. Where a state law requires it, we will inform you of the specific thresholds, rights, and deadlines that apply to you.

15. Location Data

Precise location is off by default. If you enable SOS or family alerts, location is collected only while the feature is active or when you trigger an alert, according to the permission you grant (while using the app or always). We share it only with the contacts and partners you designate. You may turn it off in your device or app settings. Some safety features will not work without it. We do not sell location data or use it for advertising. Precise location is treated as highly sensitive information and requires your separate, revocable authorization. When the feature is off, we do not collect location in the background; we do not combine location with health data to create inferences; chosen contacts receive only the information necessary to respond to the alert; and the feature does not remain active after an alert. We perform periodic technical checks to ensure this behavior.

16. Cookies, SDKs, and Tracking Technologies

We use cookies and similar technologies on our website and software development kits (SDKs) in the apps for essential functions (log-in, security, load balancing), preferences, and privacy-protective analytics. We do not use advertising cookies or SDKs on pages or screens where health data is entered or displayed. You can manage cookies in your browser and in our website's cookie settings.

17. Emails, Text Messages, and Push Notifications

With your consent, we send transactional and wellness messages by SMS, push, and email (reminders, plan approvals, alerts). Frequency varies. Message and data rates may apply. Reply STOP to cancel SMS and HELP for help. Consent to texts is not a condition of purchase. We request separate consents for: (1) essential or transactional SMS; (2) marketing messages; (3) automated messages; (4) messages to third parties; and (5) emergency alerts, in accordance with the Telephone Consumer Protection Act (TCPA) and state laws. We keep proof of each consent (text presented, date, and means) and honor revocations, including by STOP. Your authorization for us to send messages to an emergency contact does not replace that person's consent: you represent that you have their permission; we ask you to confirm this when registering the contact and keep a record of that confirmation. You can unsubscribe from email using the link in each message and manage push notifications in your device settings. Carriers are not liable for delayed or undelivered messages.

18. Children's Privacy

The Services are for adults 18 years of age or older. COPPA primarily protects children under 13, and some state laws grant additional rights to teenagers and minors under 18; for that reason we apply the following controls:

- **Under 13:** we do not permit use; if we detect an account, we block it and delete its data, and notify the responsible adult where possible.
- **Teen aged 13 to 17 attempting to register:** account creation is not permitted; we delete the data collected during the attempt.
- **Adult uploading the health data of their child or another minor:** the Services are not designed for this; do not enter minors' data. If we receive it, we will delete it or, where the law permits and verifiable parental consent exists, process it only to the extent strictly necessary.
- **Minor's data received through a connected or family device:** we do not use it for profiling and delete it upon detection.
- **Communities:** reserved for users 18 and older.

If you believe a minor has given us data, contact us at the address in Section 26.

19. Data Retention and Deletion

When we receive a valid deletion request, we will delete or de-identify personal information within the period required by applicable law, subject to legal exceptions. Backup copies may temporarily remain in restricted systems and will be deleted according to the applicable backup cycle; during that period they remain blocked and will not be used for ordinary purposes.

Data	Retention
Account and health/wellness data	While your account is active; deleted or de-identified within 30 days after you delete the account. Backup copies are permanently deleted within a maximum of 90 days.
Nutrition plans and professional notes	Deleted with your account, unless state

Data	Retention
	professional-records laws require retention (typically 5 to 10 years, depending on the state and type of record). While retained, their use is restricted to that legal purpose. We will notify you if this applies.
Billing and tax records	Up to 7 years as required by law.
Security and fraud logs	Up to 24 months.
De-identified or aggregated data	May be retained; we do not attempt to re-identify it.
Data sent to Apple Health, Google Health Connect, or other platforms	Governed by those platforms' policies; we cannot delete it from them. You must delete it from those platforms.

We do not promise complete deletion of data that we cannot technically guarantee (for example, copies already delivered to third parties or to platforms you connected).

20. Security and Breach Notification

We use encryption in transit (TLS 1.2+) and at rest, least-privilege access controls, multi-factor authentication for staff systems, logging, vulnerability management, vendor risk reviews, and staff training. No system is perfectly secure. If a breach affects your information, we will notify you and regulators as required by applicable law, including state breach laws and the FTC Health Breach Notification Rule.

21. International Data Transfers

FYA TECH SAS is headquartered in Colombia. The entity responsible for processing is FYA TECH SAS. Your data is stored with cloud providers with infrastructure in the United States and other countries and may be accessible from Colombia by FYA TECH SAS personnel and from the countries where our service providers operate. The categories transferred are account, usage, and support data and, where you provide them, health and wellness data. We use contractual safeguards with confidentiality, security, and use-limitation terms. U.S. users may exercise their rights through the channels in Section 12 even when the data is located in Colombia. For users in Colombia, we also comply with Law 1581 of 2012 and Decree 1377 of 2013 (Habeas Data), and you may exercise your rights as a data subject through the contact below.

22. Community Features and User Content

A post may reveal health data. Before you post, we show you a specific warning. Posts, comments, club activity, and profile data that you share in the community may be visible to other members. The visibility of each post (public, members-only, or private) is shown before posting and, by default, is private. Other users could copy or redistribute content you post. We do not use community content to train AI models; it may be used for moderation and security. You can set your profile and posts to private or delete them from the post itself or in Settings > Privacy > My Data. Posting third parties' information without their authorization is prohibited. We

moderate content for safety and may remove content that violates our Terms. Health information you post openly is no longer protected by the controls in this Policy.

23. Third-Party Services, Devices, and Links

The Services connect with third-party platforms, such as Apple, Google, device manufacturers, health platforms, and payment providers. Their privacy policies apply to what they collect. Product distributors ship physical orders as our service providers. Links to other sites are not under our control.

24. Do Not Track and Global Privacy Control

We honor Global Privacy Control as a request to opt out of sale and sharing where applicable, although we do not sell or share. Our website does not respond to browser "Do Not Track" signals because there is no common standard, and we do not track you on third-party sites.

25. Changes to This Policy

We may update this Policy. We will post the new version with a new date and, for material changes, notify you in the app or by email in advance. For any new use of consumer health data, we will first ask for your consent. Prior versions are available upon request.

26. Contact Us

Privacy Office, COPP-ADRESD / FYA TECH SAS
Email: support@coppadresd.com
Address: Carrera 57 # 99 A - 65, Office 1303, Torres del Atlántico, Barranquilla, Colombia

Website: coppadresd.com

27. Appendix A: App Store and Google Play Disclosure Map

This table summarizes the data and is used to complete Apple's privacy labels ("App Privacy") and Google Play's "Data safety" form consistently with this Policy. It must match the installed SDKs, app permissions, data sent to Apple, Google, analytics services, and Stripe, actual use of identifiers, HealthKit, account-deletion mechanisms, iCloud configuration, and consent screens. Do not declare "Not used for tracking/advertising" if attribution, ad measurement, or indirect advertising exists.

Data type	Collected	Linked to user	Used for tracking / advertising	Purpose	Shared with
Health and fitness	Yes	Yes	No	App functionality, personalization	Service providers; professionals

Data type	Collected	Linked to user	Used for tracking / advertising	Purpose	Shared with
Contact information (name, email, phone)	Yes	Yes	No	Account, communications	Service providers
Precise location	Optional (SOS/family)	Yes	No	Safety features	Contacts and partners chosen by the user
Financial information (purchases)	Yes (tokens, history)	Yes	No	Payments	Payment processors
User content (messages, posts, photos)	Yes	Yes	No	Functionality, community	Service providers; other members for public posts
Identifiers (device ID, user ID)	Yes	Yes	No	Security, analytics	Service providers
Usage and diagnostics	Yes	Yes	No	Analytics, performance	Service providers

- **Apple:** link this Policy in App Store Connect and in the app; declare Health & Fitness data; observe App Review Guideline 5.1.3 (do not use health data for advertising or data mining); offer in-app account deletion (5.1.1(v)); HealthKit data must not be stored in iCloud.
- **Google Play:** complete the Data safety form and the health apps declaration; include a web link to delete the account and data; request location permissions only with a declared use; follow the User Data policy and the Health Connect permissions policy.

© 2026 FYA TECH SAS. COPP–ADRESD® is a wellness program. It does not diagnose, treat, cure, or prevent any disease and does not replace medical care.
